

AI Branding with Image Generation

Task 2 – The Creative Visionary

Submitted By:

Laraib Zafar

Internship Program:

Generative AI Internship – DecodeLabs

Date:

June 8, 2026.

Introduction

The purpose of this project was to create a complete visual identity for a fictional technology startup using Generative AI image generation tools. The selected company for this project is NovaTech AI, a futuristic artificial intelligence company. The project focuses on maintaining a consistent Cyberpunk-Corporate branding style across all visual assets.

Tools Used

- ChatGPT / DALL-E
- AI Image Generation Tools
- Microsoft Word
- GitHub

Brand Information

Company Name: NovaTech AI

Industry: Artificial Intelligence & Technology

Theme: Cyberpunk Corporate

Color Palette:

- Neon Blue

- Purple
- Black
- Silver

Asset 1 – Logo Concept

Prompt Used

Design a premium futuristic logo for "NovaTech AI", a next-generation artificial intelligence company. Minimalist yet powerful design, glowing neon blue and purple accents, sleek geometric shapes, cyberpunk corporate aesthetic, luxury tech branding, clean white background, vector style, ultra sharp details, professional startup identity, 8k quality.

Generated Output

[Insert Logo Screenshot Here]

Description

This logo was designed to represent innovation, intelligence, and futuristic technology while maintaining a professional corporate appearance.

Asset 2 – Website Hero Banner

Prompt Used

A futuristic AI headquarters at night, glass skyscrapers illuminated with neon blue and purple lights, advanced holographic displays, AI engineers working in a premium corporate environment, cyberpunk city skyline in the background, cinematic lighting, ultra realistic, luxury technology atmosphere, depth of field, volumetric lighting, highly detailed, professional website hero image, 8k masterpiece.

Generated Output

[Insert Hero Banner Screenshot Here]

Description

This hero banner showcases the futuristic vision of NovaTech AI and highlights its advanced technological environment.

Asset 3 – Social Media Branding Banner

Prompt Used

NovaTech AI corporate branding banner, futuristic digital landscape with holographic AI networks, glowing data streams flowing across a cyberpunk city, elegant typography space reserved for company slogan, premium blue and purple color palette, luxury corporate marketing design, highly realistic, cinematic composition, professional LinkedIn and social media banner, 8k ultra detailed.

Generated Output

[Insert Social Media Banner Screenshot Here]

Description

The social media banner was created to maintain brand consistency across online platforms and marketing campaigns.

Asset 4 – Icon Set

Prompt Used

A premium set of futuristic technology icons for NovaTech AI including Artificial Intelligence, Cloud Computing, Cyber Security, Data Analytics, Automation, Machine Learning and Innovation. Glowing neon blue and purple cyberpunk style, clean vector design, consistent corporate branding, transparent background, ultra sharp details, modern startup aesthetic, professional UI icon pack, 8k quality.

Generated Output

[Insert Icon Set Screenshot Here]

Description

These icons were generated to support user interfaces, websites, and digital products while maintaining a unified brand identity.

Asset 5 – Mobile App Mockup

Prompt Used

A futuristic smartphone displaying the NovaTech AI dashboard, holographic interface emerging from the screen, advanced AI analytics, glowing cyberpunk UI, floating data

visualizations, premium luxury technology design, neon blue and purple lighting, realistic reflections, ultra detailed smartphone mockup, cinematic composition, product showcase quality, 8k masterpiece.

Generated Output

AI Branding with Image Generation

Task 2 – The Creative Visionary

Asset 3 – Social Media Branding Banner

Prompt Used

NovaTech AI corporate branding banner, futuristic digital landscape with holographic AI networks, glowing data streams flowing across a cyberpunk city, elegant typography space

reserved for company slogan, premium blue and purple color palette, luxury corporate marketing design, highly realistic, cinematic composition, professional LinkedIn and social media banner, 8k ultra detailed.

Generated Output

Description

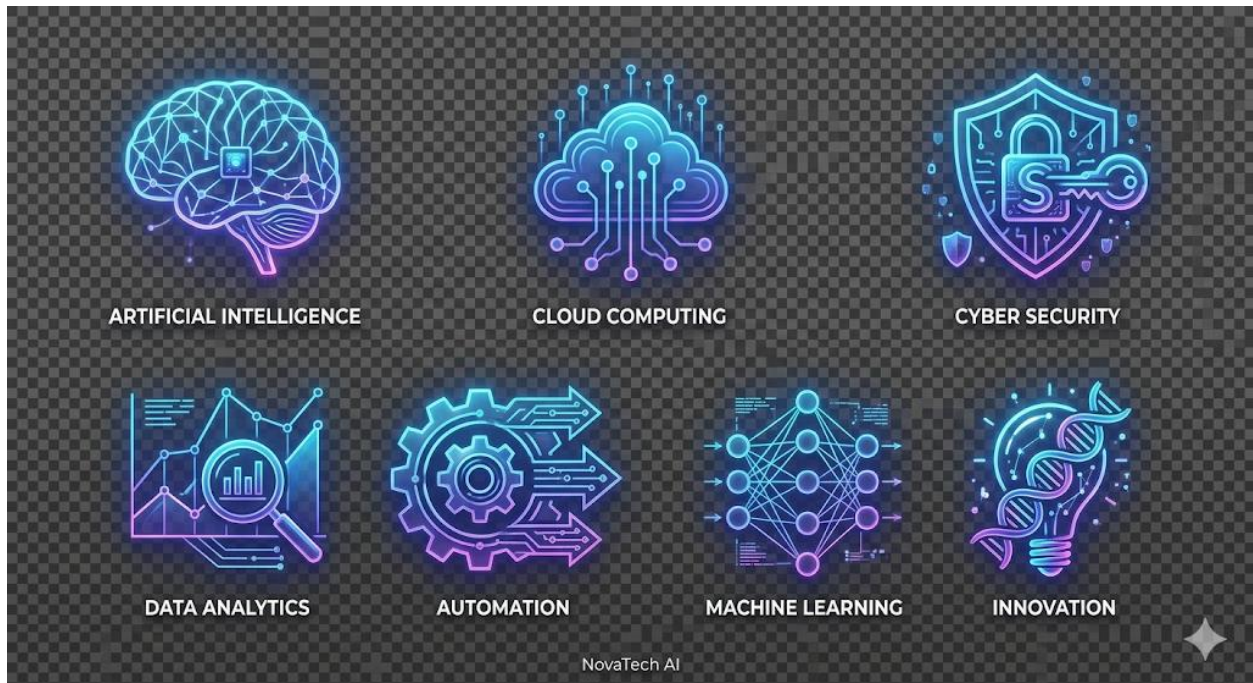

The social media banner was created to maintain brand consistency across online platforms and marketing campaigns.

Asset 4 – Icon Set

Prompt Used

A premium set of futuristic technology icons for NovaTech AI including Artificial Intelligence, Cloud Computing, Cyber Security, Data Analytics, Automation, Machine Learning and Innovation. Glowing neon blue and purple cyberpunk style, clean vector design, consistent corporate branding, transparent background, ultra sharp details, modern startup aesthetic, professional UI icon pack, 8k quality.

Generated Output

Description

These icons were generated to support user interfaces, websites, and digital products while maintaining a unified brand identity.

Asset 5 – Mobile App Mockup

Prompt Used

A futuristic smartphone displaying the NovaTech AI dashboard, holographic interface emerging from the screen, advanced AI analytics, glowing cyberpunk UI, floating data visualizations, premium luxury technology design, neon blue and purple lighting, realistic reflections, ultra detailed smartphone mockup, cinematic composition, product showcase quality, 8k masterpiece.

Generated Output

Description

The mobile app mockup demonstrates how NovaTech AI products could appear on modern mobile devices using futuristic interface concepts.

Results

All generated assets successfully followed the Cyberpunk-Corporate theme and maintained a consistent visual identity. The project demonstrates how Generative AI can be used for branding, marketing, and digital design.

Learning Outcomes

Through this project, I learned:

- AI Image Generation
- Advanced Prompt Engineering
- Brand Identity Creation
- Visual Consistency
- Practical Applications of Generative AI

Conclusion

This project successfully demonstrated the use of Generative AI for creating professional branding assets. By using detailed prompts and maintaining a consistent visual style, it was possible to generate high-quality creative content for a fictional technology startup. The experience enhanced my understanding of prompt engineering and AI-assisted design workflows.
